**Undergraduate Research Opportunities**

Interested in **Ecology, Behavior, Conservation, or Evolution?**

Want to gain **research experience**?

**Join the Patricelli Lab!**

Our lab investigates mate choice, sexual signaling, foraging behavior, and behavioral plasticity in a threatened bird species, the greater sage-grouse. Motivated students will help to analyze high definition video recordings of courtship behavior, aggressive interactions, or robot experiments.

**Requirements:** An interest in biology and good attention to detail! Interns will be expected to work at least 5 hours/week. No previous research experience necessary. Preference given to students who can continue for more than one quarter.

**Course credit and transcript notation available for your time!**

Many students complete their theses/practicums in this lab!

**Want to get involved? Want more information?**

Attend one of the following Information Sessions:

- **Wednesday Oct 2nd, 2-3 PM**
- **Thursday Oct 3rd, 4-5 PM**

**2343 Storer Hall**

(If you cannot make one of these sessions, email Eric Tymstra: eftymstra@ucdavis.edu)
