Job Announcement

Company: Westervelt Ecological Services, LLC  
Position: Paid Internships (Summer) – Geographic Information System (GIS)  
Location: Sacramento, California

About us: Westervelt Ecological Services (WES) specializes in the restoration and conservation of wetlands, vernal pools, and other listed species habitats in the form of conservation and mitigation banks that provide environmental mitigation and habitat services to landowners, businesses, government agencies, and land trusts throughout the State of California. Our mission is to provide enduring ecological solutions for the benefit of our stakeholders and the lands we conserve.

Description: The primary purpose of this paid position is to work with the WES GIS, Design, Construction Management, and Land Stewardship teams to establish habitat restoration sites. Core duties would consist of providing the WES with ArcGIS, GPS, and general graphics support. Along with office work, interns will have the opportunity to participate in a wide variety of fieldwork activities including survey data collection, habitat monitoring, and construction management. Unique opportunities include GPS training and the ability to work along high-level professionals in GIS, Ecology, and Conservation fields.

Qualifications include:

- Proficiency in ArcMap, Adobe, and MS Office computer platforms.
- Well-developed communication and people skills. Ability to effectively work in a team environment with associates and customers.
- Ability to travel to remote projects and conduct field investigations. Must have a valid driver’s license.
- Must be highly motivated.
- Work schedules will be adjusted to the requirements of the activities and projects.
- Applicants must be enrolled in classes for Fall Term 2020, actively pursuing a degree in geography, landscape architecture, biology, botany, environmental studies, restoration ecology, or related field.

Start Date: May/June 2020.
